Weekly - in order!

- test & adjust pH
- test bromine & shock with 6.6 oz of 7.5% bleach to get to 4-10ppm
- Bromine: **1**:1.25, **2**:2.5, **3**:3.75, **4**:5, **5**:6.25, **6**:7.5, **7**:8.75, **8**:10

Every 2 to 4 weeks - in order!

- test & adjust TA
- test & adjust calcium
- All weekly items

Every 3-4 months

- Purge with Ahh-some
- drain, refill, balance the water, add the sodium bromide, shock, and put the bromine tablets back in

Notes

- Bromine must be below 10 to test pH accurately
- Check that floater has tabs in it
